Self-Lumping Techniques for DFEM S_N Transport in 2D and 3D Cartesian Geometries

By: Michael Hackemack

February 10, 2013

1   Introduction

In these notes we give the functional forms for all of the 2D quadrilateral basis functions that we will analyze our lumping schemes for.

2   1D Interpolation Nodes

3   2D Basis Functions

3.1

4   3D Basis Functions
